Sea Eagle[®] Inflatable Rescue Board

With over 50 years of experience in inflatable watercraft design and manufacturing, Sea Eagle is proud to announce the launch of the high-performance Sea Eagle Inflatable Rescue Board. The all drop-stitch constructed Rescue Board specially designed by and for rescue personnel. Nonslip EVA foam padding makes it comfortable to kneel or lie on. Light-weight ergonomic design makes it ideal for flood rescue, big waves or strong surf. 15 psi of working pressure makes it super buoyant, incredibly stable and easy to glide on the water. Four reinforced handles on top and dual side grab lines for easy grip. Eleven strong stainless steel D-rings for attaching equipment. All these features place the Sea Eagle Rescue Board ahead of the rest. Our Rescue Board is ideal for flood rescue, river rescue, beach patrols, ocean rescue, lifeguard services, and the most demanding night rescue conditions.
